### KYLIE DUTTON

### VICE PRESIDENT OF WINEMAKING AND PRODUCTION

*“My vision for the future of our vineyards and winemaking business is one where tradition meets innovation—a place where every bottle tells a story of dedication, resilience, and love for the art of winemaking. It’s a future where each generation adds its chapter to an ever-evolving legacy, ensuring that it thrives and adapts while staying rooted in our original values.”*

—Kylie Dutton

Kylie Dutton, the middle daughter of Joe and Tracy Dutton, with an adventurous spirit, is reflected in her pursuit of making the best wines possible from her family’s vineyards. Kylie developed a passion for winemaking early on. Surrounded by the aromas of wine and the taste of ripe fruit from the vines, Kylie has always had a deep connection to the land. This early exposure cultivated her link to the world of wine

Kylie pursued her academic interests by earning a bachelor’s degree in Agriculture Economics from The University of Arizona, and a certificate in Agriculture Leadership and Innovation. After graduation, she chose to return to her roots at Dutton Estate Winery, driven by her lifelong passion for wine.

Kylie began her professional journey in the cellar, working closely with the winery’s consulting winemaker, Bobby Donnell, as a Harvest Coordinator for three years. She further broadened her experience by interning for a harvest in New Zealand and obtained a Winemaking Certificate from UC Davis and returned to Dutton Estate Winery as Assistant Winemaker for another three years.

Today, Kylie serves as the Vice President of Winemaking and Production at Dutton Estate Winery. Her unwavering love for wine has been the guiding force behind her successful career in winemaking. Kylie works alongside her sister, Kyndall, and together they oversee the winery’s daily operations. Kyndall and Kylie carry forward the Dutton family’s proud legacy as pioneering women in the wine industry. They deeply value their agricultural heritage, dedicating themselves to caring for the land and producing outstanding wines.
